

## Verrica Pharmaceuticals to Participate in the 19th Annual Needham Virtual Healthcare Conference

April 9, 2020

WEST CHESTER, Pa., April 09, 2020 (GLOBE NEWSWIRE) -- Verrica Pharmaceuticals Inc. ("Verrica") (Nasdaq: VRCA), a dermatology therapeutics company developing medications for viral skin diseases requiring medical interventions, today announced that Ted White, Verrica President and CEO, will virtually present at the 19<sup>th</sup> Annual Needham Virtual Healthcare Conference on Wednesday, April 15, 2020 at 2:10 p.m. ET.

Live webcasts of the presentations can be accessed at the company's Investors page under Events and Presentations at <https://investors.verrica.com/events-and-presentations>. Webcast replays will also be available on this website shortly after conclusion of the event for 30 days.

### About Verrica Pharmaceuticals Inc.

Verrica is a dermatology therapeutics company developing medications for viral skin diseases requiring medical interventions. The Company's late-stage product candidate, VP-102, is a potential first-in-class topical therapy for the treatment of molluscum contagiosum and common warts. Molluscum is a highly contagious viral skin infection affecting approximately six million people, primarily children, in the United States, and common warts are contagious skin growths affecting 22 million people. There are currently no FDA-approved treatments for molluscum or common warts. Following positive topline results from two pivotal Phase 3 trials, the Company submitted an NDA on September 13, 2019 for VP-102 for the treatment of molluscum; on November 26, 2019, the Company received notice that the FDA accepted the NDA for filing, with a Prescription Drug User Fee Act (PDUFA) goal date of July 13, 2020. If approved, VP-102 will be marketed in the United States under the conditionally accepted brand name YCANTH™. Verrica intends to commence a Phase 3 program in the first half of 2020 to evaluate VP-102 for common warts. VP-102 is also currently in a Phase 2 trial for the treatment of external genital warts. A second product candidate, VP-103, is in pre-clinical development for plantar warts. For more information, visit [www.verrica.com](http://www.verrica.com).
